

Sharrow Scientists!

Science week was a great success. The whole school took part. We all worked scientifically. Year 4's Science Day was all about energy. We made catapults inspired from Ancient Greece and discussed the types of energy used. Then we carried out an investigation in the hall. It was great to see so many parents joining in enthusiastically and helping generate questions for further inquiry. Everyone enjoyed competing to see how far they could launch their objects.

Thank you to our amazing parents for joining their children with these fun activities. Take a look at what we did.
